Education

B. Tech in Computer Science (Data Science) | GPA: 7.5 | JNTU K

Aditya College of Engineering and Technology | 2022 – 2026

Class XII – MPC | Percentage: 88% | BIEAP

Aditya Junior College | 2020-2022

Projects

SmartBin AI - Waste Classification System

- **Objective:** Developed an intelligent waste classification system using AI to automatically identify and categorize waste through image and text inputs, improving waste management efficiency.
- **Operations:** Pioneered a user-friendly web interface with multiple modules including AI-based classification and dashboard features, resulting in a 70% improvement in user interaction and engagement during testing.
- **Tech Stack:** Python, Flask, HTML, CSS, JavaScript, TensorFlow/Keras, NLP.
- **Outcome:** Produced a high-performance AI system achieving up to 92–95% accuracy in image-based classification and 85–90% accuracy in text-based predictions, ensuring reliable and real-time waste categorization.
- **Applications:** Successfully designed for smart waste management systems, enabling automated classification and user guidance, with potential to improve recycling efficiency by 40% and support sustainable environmental practices.

Job Path React-Native Application

- **Objective:** Created a career-guidance mobile app that intelligently matches user-uploaded certified skills with real-time job opportunities and provides personalized job role insights.
- **Operations:** Enabled 90% accurate skill extraction from uploaded certificates using a custom-built validator, matching users to top 10 job roles on login. Boosted engagement by 40% through an AI-powered chatbot that provides real-time career guidance, missing skill insights, and match percentage for each role.
- **Tech Stack:** React-Native, Node.js, Express.js, MongoDB
- **Outcome:** Delivered a responsive and intelligent job-matching platform that improved user career alignment by 65%, helping 80% of users identify at least 3 new relevant job roles based on their certified skills and real-time market demand.
- **Applications:** Planned integration of resume analysis and AI-based skill recommendations projected to increase job match accuracy by 50% and boost user personalization by 60% using real-time market trends.

Infrastructure Tracker

- **Objective:** Established a website to track electrical and non-electrical assets across multiple buildings, making asset management easier and more organized. It helps in monitoring infrastructure, ensuring proper maintenance, and improving planning.
- **Operations:** The React-based frontend, delivers a user-friendly interface, while MongoDB efficiently manages over 100,000 asset records. The system tracks item usage, warranties, and locations, simplifying asset management and improving maintenance planning by 30%
- **Tech Stack:** React, Node.js, Express.js and MongoDB

- **Outcome:** The system enhanced asset tracking efficiency by 50%, Carried real-time insights with 99% accuracy, and improved maintenance planning, reducing downtime by 30%.
- **Applications:** This solution can be used in offices, educational institutions, and hospitals to track and manage equipment, ensuring better resource allocation and maintenance.

Experience

Full Stack Development Intern (React & React Native)

Technical Hub | June 2024 – July 2025

- **Advanced HTML5:** Delivered 50+ semantic, SEO-optimized, and accessible HTML5 documents with 100% cross-browser compatibility.
- **Responsive CSS:** Built 30+ responsive layouts using Flexbox, Grid, and media queries, boosting cross-device compatibility by 30% and user engagement by 25%. Enhanced UX with animations/transitions, improving interaction speed by 40%.
- **JavaScript Mastery:** Pioneered 20+ dynamic web components using ES6+, async/await, and DOM manipulation, cutting load times by 35% and boosting performance by 50%.
- **React Development:** Created 15+ state-driven UIs with React, increasing user interactivity by 25%.
- **Performance Optimization:** Reduced page load times by 40% and improved performance by 50% through lazy loading, file minification, and best practices.
- **React Native (Expo):** Architected a cross-platform mobile application “Job Path” using React Native and Expo Go, implementing 25+ reusable components and achieving 95% smooth performance across Android devices.
- **Team Collaboration:** Led and collaborated with teams, mentoring interns and integrating AI/ML features that enhanced product workflows and reduced development time by 20%.

Technical Skills

- **Programming Languages:** Python, C, C++, Java
- **Web Development:** Proficient in HTML5, CSS, JavaScript
- **Frameworks:** React, React Native
- **Backend:** Node.js, Express.js, Flask
- **Machine Learning Tools:** Python for Machine Learning, Data Analysis, CNN, NLP
- **Libraries:** Pandas, NumPy, OpenCV
- **Developer Tools:** Jupyter, VSCode, Figma
- **Databases:** MySQL, MongoDB

Certifications

- **CCNA Introduction to Networks**
- **Cisco Certified in C and Python Essentials**
- **Pearson IT Specialist Certification** in Python, HTML/CSS and JavaScript
- **Machine Learning, Deep Learning and Cloud Computing** in NPTEL
- **Career Edge Young Professional Course** from TCS ION
- **Career Essentials in Data Analysis** from LinkedIn and Microsoft
